Sequences

Definition

A **sequence** $\{a_n\}$ is an ordered list of numbers of the form $\{a_0, a_1, a_2, \ldots, a_n, \ldots\}$.

Sequences

Definition

A **sequence** $\{a_n\}$ is an ordered list of numbers of the form $\{a_0, a_1, a_2, \ldots, a_n, \ldots\}$.

The Fibonacci Sequence

$\{0, 1, 1, 2, 3, 5, 8, 13, 21, 34, \ldots\}$ where $a_0 = 0$, $a_1 = 1$, and $a_n = a_{n-1} + a_{n-2}$ for $n > 2$.

An **infinite series** is the sum of an (infinite) sequence; It has the form: $\sum_{k=1}^{\infty} a_n = a_1 + a_2 + \cdots + a_{n\ldots} = S_n$. As before, if $\lim_{n\to\infty} \sum_{k=1}^{\infty} a_n = \lim_{n\to\infty} S_n = L$ then the series **converges**; otherwise it **diverges**.
