

Determine the radius of convergence of the following power series.

1. $\sum \frac{x^k}{5^k}$

Use the geometric series $\sum_{k=0}^{\infty} x^k = \frac{1}{1-x}$, for $|x| < 1$ to find a power series representations for the following functions, and determine the interval of convergence.

2. $f(x) = \frac{10}{1-x^2}$.

3. $f(x) = \frac{2x^2}{1-x}$.

Eliminate the parameter in following equations to obtain a single equation in terms of x and y .

4. $x = 2t, y = 4t^2$.

Determine dy/dx in terms of t and evaluate it at the given value of t .

5. $x = 2t, y = 4t^2; t = 1$.

Give a set of parametric equations that describes the curve.

6. A circle centered at $(0, 0)$ with radius 6, generated clockwise.
