

You must show your work to receive credit. Unless stated otherwise, each problem is worth 5 points.

Use the graph to complete the following problems.

1. [1 pt] Graph the point $(-3, -5)$.
2. [2 pts] Use the graph to determine the x -int(s) of $f(x)$.
3. [2 pts] Use the graph to determine the y -int(s) of $f(x)$.

Solve the equations.

4. $8x - 5 = 11$

$$\begin{aligned} 8x - 5 + 5 &= 11 + 5 \\ \frac{1}{8}8x &= \frac{1}{8}16 \\ x &= 2 \end{aligned}$$

6. $5(x - 2) + 18 = 4(x + 3)$

$$\begin{aligned} (x - 2) + 18 - 18 &= 4(x + 3) \\ x - 2 &= 4x + 12 \end{aligned}$$

7. $\frac{3x}{2} - x = \frac{x}{10} - \frac{8}{5}$

Bonus

8. $\frac{8}{x - 4} + \frac{2}{x + 5} = \frac{12}{(x + 5)(x - 4)}$
