

1. Write the function's equation from the graph.

2. Write the function's equation from the graph.

3. Let $f(x) = (x - 3)^2 + 1$.
- Graph $f(x)$, clearly label the vertex and the y -intercept.
 - What is the maximum of $f(x)$?
 - What is the minimum of $f(x)$?
 - Find the domain and range of $f(x)$.
