

1. The cost in millions of dollars for a company to manufacture x thousand of cars is given by the equation $C(x) = 3x^2 - 18x + 63$.
 - a. Find the number of cars that needs to be produced to minimize the cost.
 - b. What is the minimum cost?
 - c. What is the domain and range of $C(x)$?
 - d. Graph $C(x)$.

2. You have 200 feet of fencing to enclose a rectangular plot that borders on a river. If you do not fence the side along the river, find the length and width of plot that will maximize the area?
