

Web Assign Information – Math 107, Section 10

Activating Your Account:

All students in Math 107 are required to have a Web Assign account. If you used a WebAssign account last semester, you may use it this semester. If you used WebAssign account for Math 107 last semester, there should be no additional charge.

1. Go to www.webassign.net.
2. Click **I have a Class Key**. Then enter **mhu 7759 7489** and click **Submit**. You will only need to complete this once. After you have created your account, you will log in at the main page.
3. Verify that what you see is the correct information for this class by choosing “Yes, this is my class” or “No, this is not my class.”
4. If you have **used WebAssign before**, follow the instructions on **Use Your Existing Account**.
5. If you are **new to WebAssign**, follow the instructions **I need to Create a WebAssign Account**, and click “continue.”
6. The institution code is mhu. If you are creating a new account use last name dot first name for your username (example: John Smith would have username smith.john).
7. After logging in, you will be given the option to pay now with a credit card or wait until later. WebAssign is free for the first two weeks. You are required to have WebAssign for this course. You may purchase through the website; another option is to purchase an access code card in the bookstore.
8. Add your email address the first time you log in so that you will receive messages from me concerning your assignments. It is best to use your MHU email account, however if you use another one, be sure that it is an account that you check frequently. Also, WebAssign will use this email address to help you with forgotten passwords.
9. If you are not able to log in, call 1-800-955-8275, then 1 when they ask for an extension. This number is only for technical assistance; no math help is available at this number.

10. Links to the WebAssign Student Guide are available on your Login page and after logging in. Please read over the guide so you are familiar with all of the features.

E-mail support: support@webassign.net

Phone support: (800) 955-8275, x1

All online homework assignments will be posted in WebAssign, and it is your responsibility to submit them by the due date and time. No late work will be accepted. (Do not wait until the last minute to start your assignment, as you never know when your computer might crash, Webassign might crash, or the Internet might go down!) When you submit your homework, it will be graded immediately. With most assignments, you will have three opportunities to submit answers. Once you open your homework assignment, you might choose to print a hard copy in order to complete your work when you do not have access to a computer. As you complete *each* question in WebAssign, you will want to click "submit". Otherwise, if you leave the screen (or choose to submit answers to another question) your work will not be saved. When you have completed a question and are ready to submit it, click "submit". (If a question has multiple parts, then you have two opportunities to resubmit each part.)

Note that some questions may require you to use symbolic formatting for your answer. Click on the "Symbolic Formatting Help" link to make sure that your notation is in the correct format. Read all questions carefully and follow all given directions for formatting your answer. For example, some questions might direct you to represent negative infinity as $-\infty$. Most questions require you to use three significant digits in your answer; however, some questions may require more significant digits. WebAssign states, "You will be given credit for any formula that is evaluated to be equivalent to the answer formula." If a question response is formatted to accept a numerator and a denominator, then you need to use the fraction form of the answer instead of its decimal equivalent.

All homework assignment grades will be visible in WebAssign. If you feel your answer has been marked wrong because of a formatting error, send an email to me stating which assignment and which problem you have an issue with. I can look at your answer and possibly give credit. After the due date the solutions will be available. It is recommended that you download the key EVERY time you have an incorrect answer.
