

Solve the system.

$$\begin{array}{rcl} 1. & x & +y = -2 \\ & x & -y = 18 \end{array}$$

$$\begin{array}{rcl} 2. & x & +6y = -5 \\ & -4x & +7y = 20 \end{array}$$

Write an augmented matrix for the following systems of equations.

$$\begin{array}{rcl} 3. & x & +y = -2 \\ & -2x & -y = 1 \end{array}$$

$$4. \ y = -x - 2 \text{ and } y = x - 18.$$

Solve the problem.

5. In a losing effort against the Nets, LeBron James scored a total of 26 points on 3-point and 2-point shots. If he made a total of 12 shots, how many 3-point and how many 2-point shots did he make?

6. There were 570 people at a school football game. The admission price was \$2 for adults and \$1 for children. The admission receipts were \$830. How many adults and how many children attended?
